(626) 561-9326

Pomona, CA

EDUCATION

California State University – Long Beach (CSULB), Long Beach, CA

May 2028

B.S. in Computer Science

GPA: 3.6

Relevant Coursework: Precalculus Algebra, Calculus I, Calculus II, Data Structures, Digital Logic and Assembly Pro, Discrete Structures with Computing Applications, Object Oriented Application Development

LEADERSHIP AND EXPERIENCE

Women in Computing (WIC),

- **School Outreach Mentor** September 2024
 - Mentored a full class of K–12 students by introducing fundamental programming concepts and leading hands-on coding activities, fostering curiosity in technology and encouraging underrepresented students to explore computer science
- **Club- Graphic designer** May 2025 - present
 - Designed visual content and promotional materials to support club initiatives, events, and outreach efforts, strengthening engagement and visibility within the campus community.

Software Developer Intern | Nuevo Hive LLC,

May 2026 – Present

- *Develop features for a vending operations platform using **Python, FastAPI, Docker, and Figma**.*
 - *Contribute to customer refund workflows and full-stack product development.*
 - *Collaborate with cross-functional teams to deliver user-focused software solutions.*
-

PROJECTS

- **Student Mart –(CSULB Marketplace)**
React, TypeScript, Next.js, Supabase, Vercel
 - *Built a scalable, campus-focused marketplace using React, TypeScript, Next.js, and Supabase, resulting in a fully deployed web application that enables students to post listings, browse items, and connect with peers through a clean, responsive, and user-friendly interface tailored to the CSULB community*
 - **TinyTasks (BeachHacks 9.0)**
React, TypeScript, Tailwind CSS, Vite, FastAPI, MongoDB Atlas, Gemini, Fetch.ai uAgents, Twilio
 - *Built an AI-powered task assistant using React, FastAPI, Gemini, and Fetch.ai uAgents, resulting in an intelligent system that detects “stuck” moments, generates actionable micro-steps with motivational feedback, and enables seamless user interaction through WhatsApp integration via Twilio*
-

TECHNICAL SKILLS

Languages: Python, HTML, CSS, Javascript, React, [Node.js](#), C++

Tools: VS Code, Git, Figma
